

# Access Health Renewal

**QRI™ (“query”): QUANTIFIED RESPONSE INDEX**  
*Captures and measures biosignals associated with inflamed, painful, congested, and injured tissue.*

## Our QRI™ (“query”) Full Body Assessment

Signals from the body indicate tissue status and guide assessment and treatment for efficiency and effectiveness. iScan™ Stress Mapping™ discovers sources and patterns of tensional reaction, for accurate understanding of the pain, problem or dysfunction and plan for its relief.

**Case below: Lyme infection 12 years brain fog and low energy + history of major car accident**

**1/18/16**

Scan detects Congestion, Irritation, and Tension in the left shoulder. Lyme “cyst” palpable.

**3/11/16**

Dysfunctions relieved, with the AHR Treatment Program. brain fog cleared, good energy. Still good two years later.

The iScan™ is safe, meeting FDA guidelines for pre-market use.

## Our Founder

**Ariel Eliana Shevenell, R.N.**

Clinical Director

Nurse-Therapist, ACURIT® Therapy

Sonotect iScan™ Diagnostician

Health professional, inventor, engineer, scientist, healer - Ariel Eliana (Wilcox) Shevenell discovered and built the technology that powers the iScan ID™ detection system and QRI® Stress Mapping™ and Assessment. She identified the principles underlying the “tissue-itis” that blocks recovery from pain, injury and dysfunction.

Over the past 20 years Ariel has helped thousands recover with these innovative methods, even in challenging or resistant cases. Her applications are based in established science and her research with MIT, Harvard, and others. The company is a Maine Technology institute awardee.

We welcome you to enjoy our gracious facility and unique healing services!

Access Health Renewal

Relieve – Refresh - Restore

174 South Freeport Rd. Suite 1A  
 Freeport ME 04032 207-865-5520

*Our program combines features and methods within intensive sessions, producing rapid and lasting results.*

## Conditions We Have Assisted Successfully

- Pain, Injury, Inflammation
- Fibromyalgia, Headache, Migraine, TMJ, Sinus
- Nerve impingement, misalignment
- Pelvic, Bladder, Rectal and related dysfunctions
- Work-related or Soft Tissue Injury, Strain
- Problems of Digestive, Nerve, Respiratory and Physical Mobility Systems
- Chronic Infection; Lyme-associated; fungal  
*Recovery possible even if present for years*
- Immune, Toxic Exposure
- Sensitivities and Challenging Disorders
- Sports Injury and Performance Optimization

## QRI™ ASSESSMENT

*Our sensor technology identifies problem areas and status, assisting diagnostic insight*

- Complete QRI® scan with our patented iScan™
- Indicates inflammation, dysfunction
- Identifies hidden infection and congestion
- Verified with palpation and mobility testing
- Accurately locates problem origins and maps sequence for effective and efficient treatment

## SYNERGISTIC MODALITIES

*Tissues are prepared to assist the ACURIT process.*

- Immune system stimulated
- Tissue warmed and loosened
- Circulation promoted to clean and nourish
- Low impact release of toxins
- Lymphatic flow increased
- Comfortable, refreshing, and relaxing

*Speeds response to our manual techniques, especially opens extensive access into the intracranial area.*

*Resources: Steam, Whirlpool, Bio-Mat, Ozone, Far Infrared Sauna, Hot Stone Massage*

## ACURIT THERAPY™

*Our unique therapy liberates tissue from persistent tension, nerve irritation, and trapped infection and congestion*

- Promotes sequential, progressive response
- Gentle, efficient, and effective
- Triggers biophysical recovery processes
- Tissue dysfunctions reverse and resolve
- Infection and congestion are relieved
- Cycles of tension and irritation eliminated
- Hands-on tissue integration
- Minimizes number of sessions to goal
- Outcome is stable, complete

## NEW SCIENCE: SUCCESSFUL RECOVERY

Our body manages its tissue functions through vast coordination at the molecular level. Mobility responses are directed by widespread communications that addresses flexibility and adaptability. When excessive force (accident), irritation or infection is sensed, survival reactions are triggered instead.

The result is persistent protective tissue resistance. At the cellular level, our parts can get as tight as steel. It's why we don't explode when we get hit or fall. In our body, once these defenses are deployed they usually cannot reverse, or "wear off." The system doesn't "reboot" automatically; the alarm never "turns off."

Even unaffected areas stiffen, joining in hidden activity to keep us functioning. We may think we've recovered from an accident, but invisibly a chronic and powerfully damaging condition of constant irritation and resistance continues.

We describe this as: "Sensors for Trauma are on overload, Persisting Tissue Inflammation and Stiffness™ - "Stopitis" being a "tissue-itis" instead of a joint "arthr-itis."

Affected tissues lock up throughout the body in vicious cycles of irritation and reaction, interfering with healing, pain relief, and mobility. At the molecular level, this perpetual stiffness and resistance is known as the basis of all diseases and dysfunctions. Its condition generates signals that the iScan® detects, locates and analyzes for diagnostic measurement.

These reactions also exist as a survival mechanism to contain infection. Such barriers can be maintained indefinitely, thwarting antibiotics, healing therapies and immune/elimination responses. Toxins continue to irritate and damage even though their origins can be unknown without iScan®.

This condition will not yield to manipulation therapies, drugs or other efforts since the tissue is still receiving messages to resist. The nervous system and intracranial region are particularly difficult to assist without gaining sufficient access to unlock tissues for drainage and flow.

Successful recovery requires "rebooting" the defense programming and integrating the relieved tissues. ACURIT®, a recently discovered process involves techniques to interrupt "Stopitis" resistance which re-set the frozen response cycles, liberate resilience and restore normal function and stability.

ACURIT® is designed to Access the Cycle that Unlocks Resistance and Irritation Targets™ and is the core of the effective, efficient **Access Health Renewal Treatment Program**. Guided by the **QRI® Stress Mapping™** and facilitated by gentle but powerful modalities, our program assists difficult, challenging cases and boosts response to other therapies.
