

FAQs about ACURIT® Treatment

Q: What symptoms are relieved by the AHR treatment program?

A: Fatigue, brain fog, pain, headache, depression, sleep problems, digestion and breathing symptoms, sinus problems, sore and swollen lymph nodes, and troubles of unknown/misdiagnosed origins

Q: What does the ACURIT™ treatment feel like?

A: You experience gentle hands on the body, sometimes with a rocking motion; nothing is forced or sudden. You feel profound relaxation and may even doze comfortably.

Q: How many people with chronic infection and pain recover with your program?

A: So far the majority who complete our program no longer have more than mild or occasional symptoms or disability (often none at all). The cleared iScan™ findings verify the improvement.

Q: What's the longest people have had trouble before seeking your help?

A: Often it's been 15 years or more. How long and how much trouble does not always cause a complicated case for recovery with our program. Often it's simply that in the past effective tools were not available to properly assist or even diagnose accurately. With our efficient methods, many such long term sufferers only need a handful of sessions to feel well again.

Q: How many treatments would it take to help me recover?

A: Problems of pain and little to no congestion/infection usually complete in 4-8 sessions. Infection/congestion adds to the process: total sessions may be 10-14. However, people are feeling better and getting back to life activities along with relief of the congestion generally at or before the midpoint. A few need a longer process to reverse exceptionally rigid or complicated conditions.

Q: How long does recovery last?

A: Since the cellular programming driving problems is recovered, the results remain resolved. We've had patients with pain who have remained fine over 20 years. Some have not needed expected surgery, others have returned to work with no further issues. Our longest infection (incl. Lyme) patients have been stable years also.

QRI® Stress Mapping is performed before each session to plan and guide, and assess results from previous:

Previous scan
Significant inflammation

Current date
Progress

Accessible today and
treatment sequencing

*Our program combines features
and methods within intensive sessions,
producing rapid and lasting results.*

Warming modalities: Steam to open skin, sinuses and respiratory system. Hot tub for circulation, massage

3 This step strengthens autonomic function and adaptation

Sauna: Far infrared for deep warmth and cleansing; special mat that promotes circulation and PEMF polarity massage. Immune boosting, tension melting. The head and neck become fully accessible for drainage and liberation, addressing many needs: infection, pain, mental function. Ozone is offered for oxygen and antioxidant benefits.

The ACURIT® manual therapy treatment: all locations identified by the QRI Stress Mapping™ are assisted. Relieves chronic interference and its programming in a complete delivery of recovery

Integration: hot stone massage facilitates new nerve and tissue communication, lymph drainage. Massaging shower—refresh, energize!

The ACURIT® Treatment Program

*New science-based skills, technologies
and resources to free your body's
healing responses for recovery from
pain, injury, inflammation, infection,
and biophysical dysfunction*

New Diagnostic Insight and Healing Resources

The fundamental interference in maintaining or regaining health is a "tissue-itis" (as opposed to a *joint* arthr-itis) involving molecular protein tension, irritation, congestion.

Trauma or threat triggers resistance for survival, locking up biophysical resources, often irreversibly, as this programming continually messages tissue abnormally.

ACURIT™ treatment reboots the system through certain body processes so programming cycles return to functioning properly, relieving tissue stress and dysfunction and allowing healing.

Achieving this result requires applying a specific and accurately targeted technique accessing a unique response that has been unknown before now.

The **iScan™** precision in locating treatment sites and verifying recovery is crucial to outcomes and success.

Our sensor technology identifies problem areas and status, assisting diagnostic insight

More info at
www.signalinsight.com

- Safe, non-contact, statistically validated
- Finds tension, irritation and congestion
- Locates infection and inflammation
- Identifies origins/contributors to pain
- Measures severity of the condition
- Indicates worsening or progress
- Captures biosignals produced by tissue
- Similar to security metal detector wand

Sinus infection, chronic; headache, GI pain

The iScanID® Detection and Diagnostic System

H 9 Infection
H 9 Fascia
S 8 Lymphatic
S 8 Trauma
S 7 Muscle
S 7 Vascular
M 6 Stiff
M 6 Joint

Identify it!

Assess & Document!

Mycobacterium and Lyme infection.
14 years brain fog and low energy

Our QRI® (“query”) Full Body Assessment

Depicts biosignals associated with inflamed, painful, congested, and injured sites.

Stress Mapping™ visualizes abnormal findings throughout the body’s anatomy, physiology and functional relationships.

- Complete QRI® scan with our patented iScan™
- Precision in locating problem origins
- Whole body clinical analysis
- Maps treatment plan for optimal outcome
- Monitors progress over the course of care
- Assures recovery. Monitors ongoing wellness

Case Study (below)

QRI® Stress Map™ Tracking

Findings: Significant infection, inflammation and tension in spine and associated tissues.
iScanID™ detects pathogen entry (30yr previous) plus tick bite site at right ankle, providing evidence and guidance for effective diagnosis & treatment.

Resolved: with five sessions at Access Health Renewal.
Improved from troubled to gifted at high school.
Stable and healthy for years.
